TORCH & TOOL RESISTANT SAFES - CLASS A & CLASS BB

Banks and financial institutions have become vulnerable to ever improving attack tools and techniques. Countering such attacks has been as much a challenge for Guardwel Industries, as it is for the user industry. Guardwel has taken the challenge head on with the development of Monolithic proprietary barriers to protect the customer valuables from such attacks. Guardwel has thus always been at the forefront to fulfill customer's needs and expectations. Our TRTL safes use proprietary superior barrier material, encased in one piece, in the rivet less body, with multiple bend techniques. Our In-house and modern casting facility ensures complete control over the quality of the TRTL Barriers. The locks, specially designed for long life, are manufactured In-house to ensure smooth, trouble free operation, for long life. Even the dislodging of a lock will not allow the Safe to open because an automatic re-locking mechanism swings into operation and keeps the door shut. The door can't be opened even if the hinges are cut. Guardwel also offers the option of keyless, mechanical as well as electronic combination locks, biometric locks and alarm systems of international class and make.

KEY FEATURES OF TORCH & TOOL RESISTANT SAFES (REF. STD. IS 550) CLASS A

1. Guardwel Class A safes provide a perfect solution to modern day burglary attacks with ever improving techniques and tools.
2. Sleek exterior look with rugged design inside ensures superior withstanding attacks.
3. Built with a special in-house made torch & tool resistant barrier of superior quality.
4. Fitted with Guardwel dual control, 8 lever key locks with options of Mechanical Combination Lock, Time Lock and Electronic Keypad locks are also available.
